

marine biodiversity of costa rica central america

marine biodiversity of costa pdf

marine biodiversity of costa rica central america Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

Biodiversity - Wikipedia

marine biodiversity of costa rica central america Costa Rica's biodiversity can be attributed to the variety of ecosystems within the country. Tropical rainforests, deciduous forests, Atlantic and Pacific coastline, cloud forests, and mangrove forests are all represented throughout the 19,730 square miles of Costa Rica's landmass. The ecological regions are twelve climatic zones.
