

marine biodiversity present status and prospects

marine biodiversity present status pdf

marine biodiversity present status and prospects Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

Biodiversity - Wikipedia

marine biodiversity present status and prospects In addition to providing many benefits to the natural world, marine ecosystems also provide social, economic, and biological ecosystem services to humans. Pelagic marine systems regulate the global climate, contribute to the water cycle, maintain biodiversity, provide food and energy resources, and create opportunities for recreation and tourism. ...

Marine ecosystem - Wikipedia

marine biodiversity present status and prospects The incidence of marine debris and its potential to cause harm has resulted in it being recognised as a global problem (STAP, 2011, Sutherland et al., 2010) and its listing among the major perceived threats to marine biodiversity (). The problem has been recognised in global and regional agreements such as the decisions of the 11th Conference of the Parties to the Convention on Biological ...

The impact of debris on marine life - ScienceDirect

marine biodiversity present status and prospects Some see ecosystem services as a means to quantify biodiversity in economic terms, usually defined as the benefits people can extract from ecosystems (Lamarque et al., 2011, Mace et al., 2012). The Millennium Ecosystem Assessment (MA) classifies benefits into four groups: provisioning, regulating, cultural, and support services (). Biodiversity may play three different roles in ecosystem ...
