marine biology cool women who dive girls in science Being in the top of the food chain, what do tigers eat in the wild? Tigers are one of the biggest cats on the planet. By nature, tigers are carnivores. They eat a good variety of prey depending upon the terrain they live in ranging from termites to baby rhinos and everything in between. Learn tiger diet in detail here.

What Do Tigers Eat? - Biology News | BioExplorer.net

marine biology cool women who dive girls in science The tiger (*Panthera tigris*) is the largest species among the Felidae and classified in the genus *Panthera*. It is most recognizable for its dark vertical stripes on reddish-orange fur with a lighter underside. It is an apex predator, primarily preying on ungulates such as deer and bovids. It is territorial and generally a solitary but social predator, requiring large contiguous areas of habitat ...

marine biology cool women who dive girls in science Folklore of Women by Thomas F. Thielton-Dyer is a largely forgotten book from a century ago with an extensive collection of proverbs, adages, and quotes from the past regarding women. The book is well worth reading, as it's a gold mine of red pill truths from different cultures across the world. What's fascinating is just how much of what is recorded here still

rings true for todayâ€™s ...
