marine boilers their construction and working dealing more especially with tubulous boilers

marine boilers their construction pdf

marine boilers their construction and working dealing more especially with tubulous boilers The general layout is that of a squat horizontal cylinder. One or more large cylindrical furnaces are in the lower part of the boiler shell. Above this is a large number of small-diameter fire-tubes. Gases and smoke from the furnace pass to the back of the boiler, then return through the small tubes and up and out of the chimney.

Scotch marine boiler - Wikipedia

marine boilers their construction and working dealing more especially with tubulous boilers The Stirling boiler is an early form of water-tube boiler, used to generate steam in large land-based stationary plants. Although widely used around 1900, it has now [when?] fallen from favour and is rarely [clarification needed] seen [by whom?]
