marine concrete structures design pdf

marine concrete structures design durability and performance 22 February 2008 1 Eurocode 2: Design of concrete structures EN1992-1-1 Symposium Eurocodes: Backgrounds and Applications, Brussels 18-20 February 2008

Eurocode 2: Design of concrete structures EN1992-1-1

marine concrete structures design durability and performance Concrete, usually Portland cement concrete, is a composite material composed of fine and coarse aggregate bonded together with a fluid cement (cement paste) that hardens over time—most frequently a lime-based cement binder, such as Portland cement, but sometimes with other hydraulic cements, such as a calcium aluminate cement. It is distinguished from other, non-cementitious types of concrete ...

Concrete - Wikipedia

marine concrete structures design durability and performance Offshore concrete structures have been in use successfully for about 30 years. They serve the same purpose as their steel counterparts in the oil and gas production and storage. The first concrete oil platform has been installed in the North Sea in the Ekofisk field in 1973 by Phillips Petroleum. Since then 47 major concrete offshore structures have been built, whereby 21 of the 47 concrete ...
