marine control practice Marine mammals are aquatic mammals that rely on the ocean and other marine ecosystems for their existence. They include animals such as seals, whales, manatees, sea otters and polar bears.They do not represent a distinct taxon or systematic grouping, but rather have a polyphyletic relation due to convergent evolution, as in they do not have an immediate common ancestor.

marine control practice Codes of practice are designed to encourage people to act responsibly. For non-native species problems it is vital that people carry out their activities (for example growing plants for garden centres, trading in exotic plants, holding a private collection of plants or animals or owning a pet) in a responsible and informed manner to minimise the risks to the environment.

marine control practice 2 " The key objectives of the Cullen Inquiry recommendations had been implemented with no perceived gaps. " The UK regulatory regime was seen as amongst the best in the world. " The use of formalised risk assessment had assisted in focusing attention on the more important risks and had improved understanding of these. " Safety cases were initially too detailed and complex, and ...
