marine engine indicating a complete treatise on the indicator and indicator diagrams as applied to marine engines classic reprint indicator diagrams and engine and boiler testing classic reprint An internal combustion engine (ICE) is a heat engine where the combustion of a fuel occurs with an oxidizer (usually air) in a combustion chamber that

is an integral part of the working fluid flow circuit. In an internal combustion engine, the expansion of the high-temperature and high-pressure gases produced by combustion applies direct force to some component of the engine.
