marine engine machinist work log work journal work diary log 131 pages 8 5 x 11 inches
Propulsion mechanics. The core job of a Machinist's Mate is the engine room. A mechanic's job in the engine room is to operate the steam plant that provides propulsion, electric power (along with Electrician's Mates), potable water, and service steam to the ship. Machinist's Mates operate the boilers that generate the steam and use it to operate main engine (propulsion turbines), turbo ...

A fireman, stoker or watertender, is a person whose occupation it is to tend the fire for the running of a boiler, heating a building, or powering a steam engine. Much of the job is hard physical labor, such as shoveling fuel, typically coal, into the boiler's firebox. On steam locomotives the title fireman is usually used, while on steamships and stationary steam engines, such as those driving ...

An Archaeology of Tools: Exhibition Overview. The Museum displays illustrate the
evolution of tool manufacturing in the United States from blacksmith-made hand-forged
tools (circa 1600 - 1830) to the early years of the Industrial Revolution and the
emergence of a vigorous American tool manufacturing industry.

The Navy had the highest demand for asbestos products in the military. That's because
these products prevented fires aboard ships and submarines. Tight quarters and poor
ventilation allowed asbestos fibers to accumulate in vessels. Navy veterans were exposed
to dangerous concentrations of asbestos ...
